Through Bolts are to be used for light to heavy duty anchoring in solid concrete. Can be
used for fastening in both internal and external environments depending on the finish
of the fastener.

Limitations

Marine use and high corrosion areas To be used in solid concrete only.

Cannot be used close to the edge of concrete

Cannot be removed without damaging the concrete

Materials			
Zinc Galvanised			
Galvanised			

Installation

It is the responsibility of the user to select the correct size and grade of fastener that will meet the requirements required for that particular installation and environment

- 1. Drill a hole to the required size and embedment depth
- Clean dust/material from hole
 Drive the anchor through the fixture into the hole until firmly against the fixture
- 4. Tighten to the appropriate torque
