

# LAP STITCHING SCREW

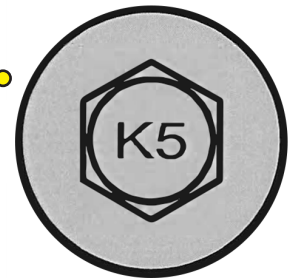

10G X 20 HEX WASHER HEAD SCREW, WITH 12MM BONDED WASHER, 2MM E.P.D.M. SEAL, AND A CLASS 5 COATING.

## HEADMARKING

### CLASS 5 COATING

- 45 Microns of Mechanical galvanising
- 70% Zinc - 30% Tin mix
- Minimum Porosity rating of 8
- 2 Hybrid top coatings
- Able to be used in ISO Category 5 locations.

5/16" HEX HEAD - use the same socket as a conventional 12g screw or Unitite.

## BONDED WASHER

Coated to Class 5, with 2mm E.P.D.M. low Shore hardness washer, which is non-conductive and has low carbon content.

## NO.1 DRILL POINT

Able to drill through 3-4 sheets of .55 roofing material.

## 10 GAUGE SCREW

- Gives excellent shear strength over conventional rivets.
- Use in place of rivets for Lap Stitching, no predrilling or using riveters. Use the same socket to drive the screw home, job complete.

## PART N°

ST10-14X20CL5LSWA

## KNURLED UNDER HEAD

Allows first sheet to be threaded up under the washer while screw continues to rotate and drill the second sheet without stripping. Locks both sheets under the washer with weather proof seal.
